# JAYSYNTH DYESTUFF (INDIA) LTD. <u>ANNEXURE-III TO THE DIRECTORS' REPORT</u> <u>MANAGEMENT DISCUSSION AND ANALYSIS REPORT - (2009)</u>

#### OVERVIEW :-

#### **ECONOMY OVERVIEW:-**

In the second half of 2008 due to sub-prime crises leading to collapse of many large global Financial Institutions. The Financial system was paralyzed. The failure of major financial Institutions in U.S.A. & European countries had devastating effect on world economy with widening credit spreads, liquidity crunch, steep fall in demand and falling margins. The de-coupling theory of developing economies remained unaffected with the recession/slow down in the advanced economies was proved invalid after having seen the swift slow down in theses economies. The growth in the developing economies even though at a slower pace is expected to cushion the impact of global melt down. According to IMF estimate the world economy in 2009 to contract by 2.5% while developing countries to grow at a slower pace of 1.6% The central banks & government of various countries acted swiftly to counter the global economic melt down in a coordinated manner by announcing massive stimulus packages and by easing monetary system. These measures are likely to lessen the impact of the crises and also make the recovery faster.

As per RBI estimate the Indian economic grew @ 6.5% in 2008-09 as against 9% growth achieved during 2007-08. The core infrastructure sector grew by 2.7% in 2008-09 as against 5.9% during 2007-08. RBI has estimated that Agriculture Sector will contribute 17.1% to GDP, Manufacturing Sector will contribute 14.8% to GDP, where as Services Sector will contribute 26.9% to GDP during 2008-09.

The Government of India has announced stimuli package to revive the economy through monetary, fiscal and export promotion measures.

#### COMPANY OVERVIEW :-

Your Company is in the business of Dyes, Pigments & Digital Inks. Textile industry is a major consumer of dyestuff and non textile sectors like plastic, rubber, paints, leather etc. are consumers of Pigments and inks. Presently Indian Textile Industry is passing through rough weather. In turn this has also affected performance of dyestuff industry in India. Despite, adverse economic conditions Company's total sale grew from Rs.7835 lacs to Rs.8102 lacs. Company's Export grew—from Rs.4769 lacs to Rs. 5091 lacs.

The Company's activity in Digital Ink is making steady progress, with the products getting recognition and approvals from major domestic as well as international buyers. Digital links are next generation products having huge growth potential and are eco-friendly.

We are closely watching the market developments, specially the impacts of textile policy of the government of India. Accordingly, strategies will mapped out by taking in consideration market conditions.

#### INDUSTRIAL STRUCTURE AND OPPORTUNITY :-

Though dyestuff industry in India has made rapid progress, India's per capita consumption of dyestuff is only at 50 gms which is one of the lowest consumptions when compared to to the global average consumption of 200 gms. The opportunity therefore exists for increasing the consumption level.

There are very large numbers of units in the Indian chemical industry and this account for large in production of dyes and chemicals. Any lapse in quality of products and non-compliance of pollution and environment related norms set up by the government may have adverse effect both in local as well international market.

The Important challenge in marketing area that dyes & chemical industry is facing is to improve the level of quality performance of products and services. Poor logistic facilities for container handling at ports and speed of transportation is one of the common concerns of the dyes & chemical industry. The dyes & chemical industry is directly related to over all growth of textile industry to which it caters for. Slow down in economy and under performance by the end user industry will have negative effect on Indian dyes & chemical industry.

Based on the unprecedented fiscal measures taken by the governments and central banks of all major world economies, the world is expecting the tide to turn. Despite of un encouraging global economic forecast the latest outlook for Indian economy is projecting a modest growth of 5% in the coming year as compared to negative growth in developed economy. Indian Industrial structure and the willingness of Indian entrepreneurs will be able to grab this opportunity.

#### OUTLOOK :-

The dyes & chemical Industry in India recorded a consistent growth in production since February 2008.but when the production of basic chemical product recorded fall of 3.8% in September 2008 this record was broken. The country is likely to register significantly lower GDP growth then 9% growth registered in 2007-08. Exports declined by 12.11% in October 2008, for the first time in last 3 years. The sharp fall in crude oil prices triggered a massive correction in petrochemicals & intermediate prices. As the prices went for free fall users decided to depend on existing stocks. Global demand came down. These two factors with adverse global environment meant a fall in production and demand for dyestuff.

The positive factor for Indian dyes & Chemical industry is the demand for its products that is largely driven by domestic market. The Indian government has announced stimuli

Despite of un encouraging global economic forecast the latest outlook for Indian economy is projecting a modest growth of 5% in the coming year, however, for Dyestuff Industry the end use segment textile industry will continue to be under pressure.

Checks and balances are in place to ensure that transactions are adequately authorized reported and recorded. The internal control system is supplemented by separate internal audit system in specific area of operation.

#### **HUMAN RESOURCES:-**
